AI & Automation Tools: Claude AI • ChatGPT • Cursor • Python scripting (basic) • Prompt engineering • Building personal productivity tools and automations using AI APIs

Soft Skills: Bilingual Customer Support • Active Listening • Documentation • Problem Solving • Empathy under pressure

Languages: English (Professional) • Spanish (Native) • Portuguese (Basic)

PROFESSIONAL EXPERIENCE

IT Help Desk Support Technician **Sep 2026 - Present**

Samsung Austin Semiconductor (via Beacon Hill Technologies), Austin, TX

- Providing first-level IT support to office and manufacturing employees across a high-volume enterprise environment, responding to requests via phone, email, walk-ups, and JIRA ticketing system.
- Troubleshooting Windows workstations, hardware, software, printers, and network connectivity issues; supporting remote users and maintaining IT asset inventory with accurate documentation in JIRA.
- Collaborating with SAS System Engineers to escalate and resolve complex infrastructure issues while maintaining IT security compliance standards and IDF room organization following 5S principles.

Field Deployment Technician **May 2026 - June 2026**

GTS Technology Solutions, Round Rock, TX

- Executed large-scale device refresh across Round Rock ISD schools and government facilities, replacing legacy equipment with newly configured workstations.
- Performed OS imaging and deployment on Windows devices using enterprise deployment tools across high-volume rollout timelines.
- Installed and configured required software applications per client specifications, ensuring devices were fully operational prior to end-user distribution.
- Decommissioned and removed existing hardware in preparation for new equipment rollout, maintaining accuracy and organization throughout the process.

IT Support Technician (Tier 1 / Tier 2) **Mar 2024 - Aug 2024**

Capgemini, Client: Progressive Insurance (Remote)

- Delivered remote technical support to an enterprise environment of approximately 5,000+ end users across Windows 10/11, macOS, and Microsoft 365 platforms.
- Resolved 20-25 tickets per day on average, consistently meeting a 15-minute response SLA and a typical resolution window of 15-30 minutes for standard incidents.
- Maintained an estimated 85% first-call resolution rate, reducing escalations and improving overall queue performance.
- Administered Active Directory: user accounts, group memberships, password resets, and access provisioning in line with corporate security policies.
- Diagnosed and resolved VPN connectivity issues (Cisco AnyConnect and similar clients) for a distributed remote workforce.
- Supported Microsoft 365 environments including Outlook, Teams, OneDrive, and SharePoint configuration and troubleshooting; installed and configured enterprise software, drivers, and endpoint tools.
- Documented incidents, root causes, and resolution steps in the corporate ticketing system to support knowledge base growth and SLA reporting.

Incident Management Specialist **Oct 2021 - Sep 2022**

Manpower Peru, Onsite

- Provided onsite Tier 1/Tier 2 support averaging 15-20 tickets daily across hardware, software, and connectivity incidents.
- Used ServiceNow, Zendesk, and Aranda Service Desk to log, categorize, prioritize, and resolve incidents within defined SLA windows.
- Administered Active Directory accounts: provisioning, group memberships, permissions, and access reviews aligned with security compliance.
- Performed Microsoft 365 tenant-level troubleshooting including mailbox issues, license assignment, and Teams/Outlook configuration.
- Delivered bilingual (English/Spanish) support to a diverse user base, improving resolution speed for Spanish-speaking employees; partnered with infrastructure and security teams on complex escalations.

Second Level Support Analyst (Tier 2) **Mar 2017 - Sep 2021**

Sapia Peru, Onsite

- Owned Tier 2 technical support for headquarters operations, handling escalated hardware, software, and configuration incidents from Tier 1.
- Used ServiceNow and Aranda as primary ticketing platforms to track incidents, document resolutions, and maintain SLA compliance.
- Managed Active Directory user lifecycle: account creation, modification, deactivation, group policy application, and password management.
- Coordinated cross-team escalations across desktop, networking, and systems teams; performed routine maintenance, patch verification, and endpoint health checks.
- Mentored junior support staff on troubleshooting methodology, ticket documentation standards, and customer communication best practices.

EDUCATION

Bachelor of Science in Computer Science **December 2016**

Instituto Universitario de Tecnologia "Tomas Lander", Venezuela

CERTIFICATIONS

- CompTIA A+, In Progress (Core 1 target: Q3 2026 • Core 2 target: Q4 2026)

PROJECTS & PERSONAL DEVELOPMENT

- Actively building personal IT and productivity tools using AI APIs (Claude, OpenAI) and Python. Portfolio in progress: anthonyjaimez.com
